Introducing Join Network-as-a-Service

No more building and operating networks. Consume your network as a predictable subscription service.

As enterprises move toward an ever-increasing number of subscription-based services, the benefits of these models is unquestioned. So, why not elevate your campus and branch network environment in a predictable way? Leveraging fast, reliable wired and wireless networking, with Zero Trust security and proactive network monitoring, Join enables leading enterprises to customize and simplify the entire network lifecycle cost-effectively.

THE FUTURE OF BRANCH AND CAMPUS NETWORKING —

We deliver a radically simplified and cost-effective, cloud-first Network-as-a-Service for enterprise campus, branch, and distributed offices that is highly scalable, secure, and reliable all monitored and operated via an AI-driven connected platform. Join enables organizations to leverage cloud-based resources to optimize employee and user experiences without the need for heavy capital investment in physical hardware or additional IT expertise.

Join Network-as-a-Service includes fully integrated end-to-end capabilities that streamlines the enterprise network infrastructure. Our service includes networking hardware, Internet/WAN connectivity, and security delivered as a fully integrated subscription-based service and operated by Join via our cloud platform.
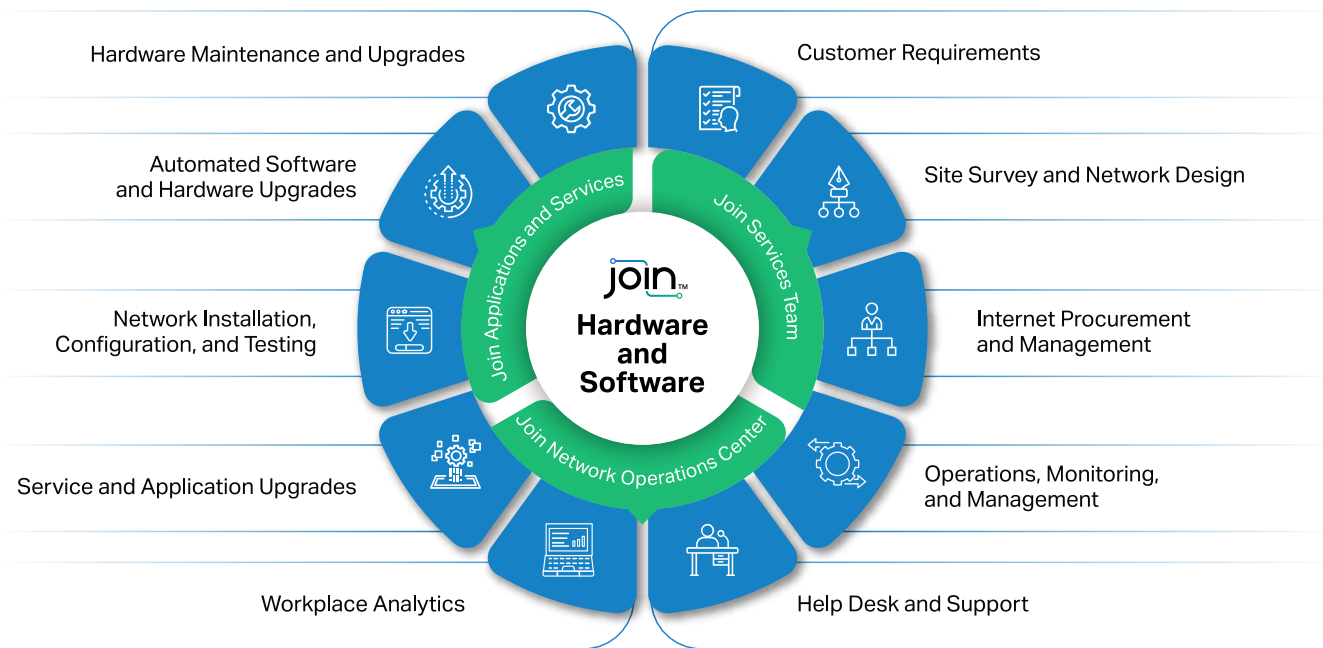

See why Join NaaS was selected as the network solution for ServiceNow branch offices.

ServiceNow is accelerating its transition to agile, distributed branch office workspaces with advanced capabilities by leveraging Join NaaS to improve productivity and manage network costs in a predictable and scalable way.
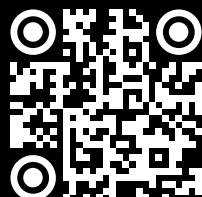

servicenow.

FOUR CORE COMPONENTS OF JOIN NAAS —

1. A complete Join technology stack comprised of networking hardware, software, an extensible data engine, and an advanced AI+ML application

2. A dedicated Join services team for network design, installation, configuration, security, and software/security upgrades

3. A fully managed state-of the art Join network operations center (NOC)

4. Advanced services such as audio/visual collaboration tools, VoIP, printers, and IoT/sensorization services all managed and supported by Join.

END-TO-END NETWORK LIFECYCLE MANAGEMENT —

Join NaaS elevates and secures employee work experiences with more automated campus and branch networks and predictable pricing. Let us operate the network, so your IT teams can focus on more strategic business outcomes.
