## Secure, ZeroTrust™ Digital Services for Modern Enterprises

Easily connect people to their work—just log in and get going.

Join delivers a high-performance, scalable digital services solution for even the most demanding corporate networks, ensuring the highest levels of security. With Join's ZeroTrust™ Platform, no individual or device gains access to the network unless they are authorized and authenticated.

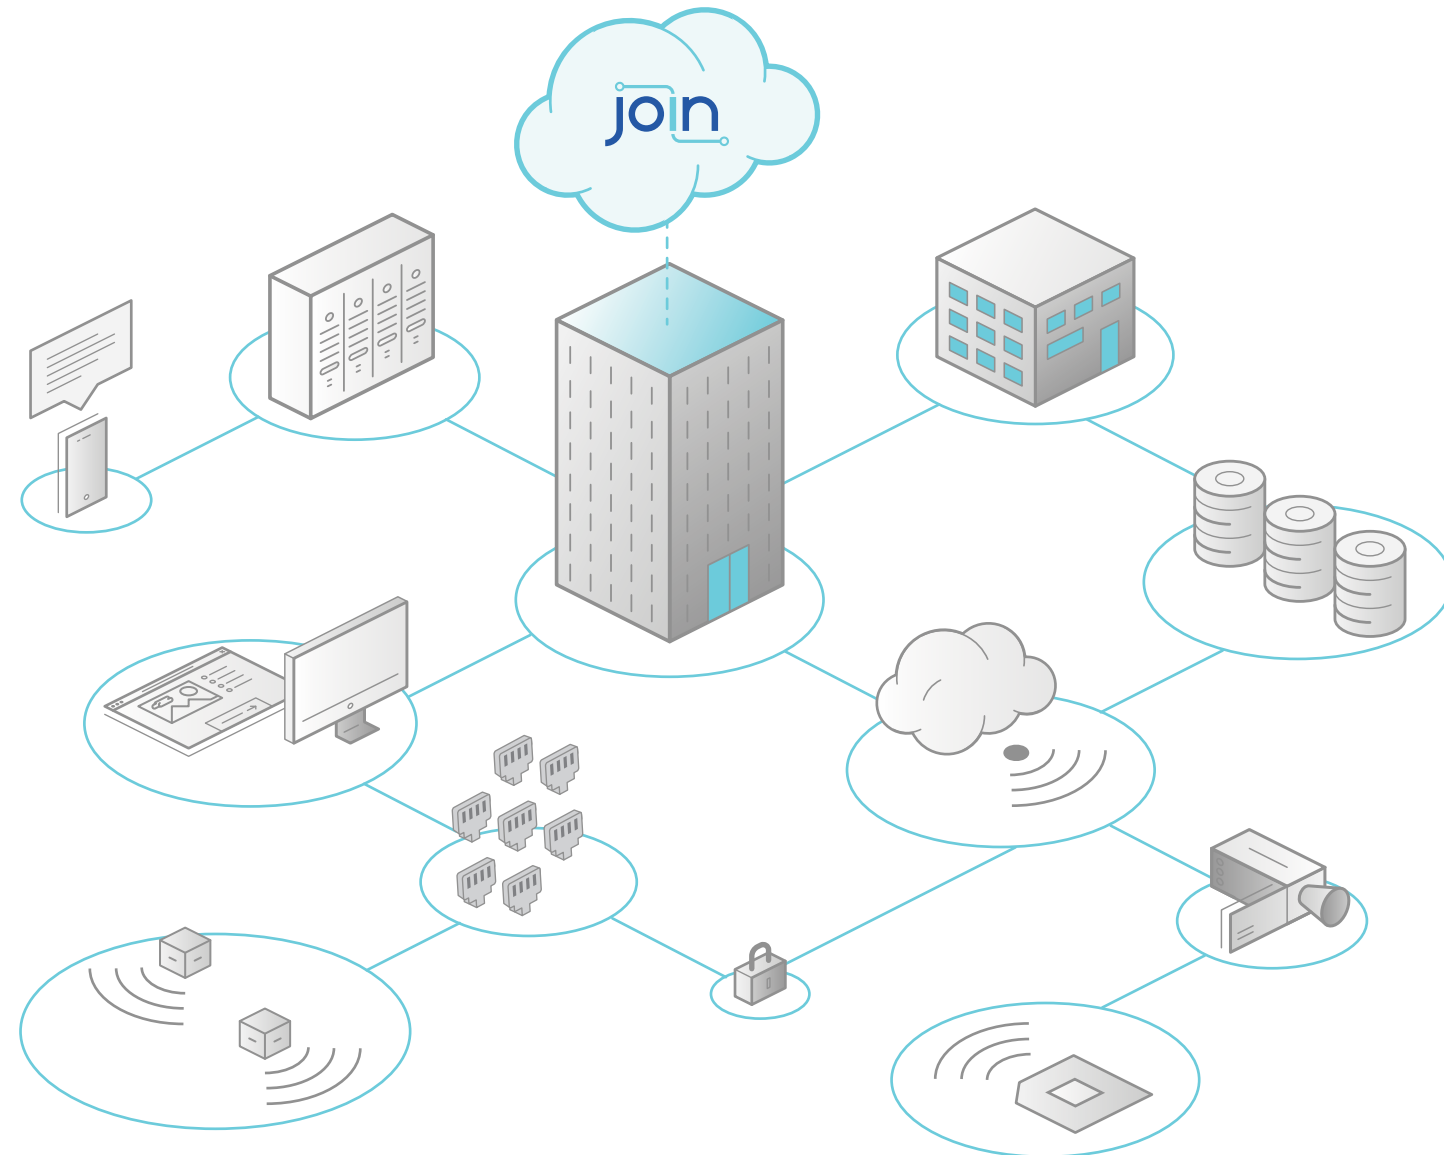

All your digital essentials  
in one platform:

- ⊕ Wi-Fi
- ⊕ Internet
- ⊕ Cloud Data Services
- ⊕ Unified Communications
- ⊕ IoT Devices
- ⊕ Fully-supported Network
- ... and more.

## Seamless, Simple, Flexible Digital Services

Simply log in and start working. Instantly access your cloud data services and be productive the day you move in—no hardware purchases, service delays, multiple service providers, cybersecurity or IT support headaches.

**Manage growth and scale on demand.** Easily light up additional offices or remote locations, onboard new employees or contractors, add or remove services, all within your own secure private network.

## Save Time and Money—Without Sacrificing Performance and Security

**ZeroTrust™ Security**—define your authorized users and devices

Join delivers security, privacy, and helps achieve compliance. Our secure, private, terabit-scale network only allows authenticated users and devices to access the network, ensuring segmented user traffic doesn't impact your entire workforce.

**Reliable, unthrottled bandwidth and data on every device**

Join is the ultimate net-neutral service. Consume as much bandwidth and data as each user needs on demand, uncapped and unthrottled.

**Always-on, proactive network intelligence**

Join monitors and analyzes performance to ensure data throughput is fast and reliable. High consumption applications are segmented to ensure a consistent, high-performance experience with no loss of network performance.

**Fully managed, easy to access and use**

Simply connect and configure your digital experience—Internet access, network, Wi-Fi, shared devices, security, videoconferencing, business phone, cloud services—from one unified platform.

**Join is a true digital experience: internet, data, and all your favorite cloud services in one secure, managed platform.**

⊕ **Secure, ZeroTrust™ Infrastructure**

Join's whitelist network ensures only authorized users and devices gain access

⊕ **Configurable Service Offerings**

Join is instantly configurable to individual or group requirements

⊕ **Corporate Data Network**

Private network connects corporate and remote offices and data centers

⊕ **Authenticated User Management**

Consistent user experience throughout the private network

⊕ **Cloud Direct Connect**

High capacity, secure connections to AWS, Azure, Google Cloud, and more

⊕ **Unified Communications**

Integrated voice, video, and chat for seamless business communications
