 - » Private WiFi
 - » Enterprise Private Cloud and Data Services
 - » Advanced Cybersecurity
 - » Segmented IoT Networks
 - » Unified Communications
 - » Fully Managed IT Infrastructure/Concierge and Support
- ...with features to fit your workstyle.

Flexible Digital Workspaces for Instant Productivity

Join gives you access to ultimate flexibility, so you can keep up with today's rapidly changing needs, workspaces, and workforce. Our tiered network services, access management, and enhanced security features make it possible—all without needing a fancy IT department to set everything up.

Experience next-gen cybersecurity, private network connectivity including wireless access, technical support, and uncapped unthrottled connection speeds all in one. Simply connect and configure your digital experience from one unified platform.

FEATURES FOR COMMERCIAL PROPERTIES AND SHARED SPACES

The lines are blurring between the office and the property. We help REITs, coworking, and flexible office spaces address cybersecurity while adding to the tenant-member experience.

Join offers REITs an all-in-one solution to bring their properties on board with the latest technology—without needing expensive experts and complicated services. Join is seamless throughout the building, making it easy to give tenants next-gen digital amenities that make you more sticky.

Join also provides essential services needed by coworking, flexible, and shared office space, from WiFi to security to IT support, allowing them to focus on their members. Members appreciate the inclusion of these over-the-top amenities and operators are able to show added value.
